

Recent Advances in Biological Membrane Studies: Structure and Biogenesis Oxidation and Energetics

Filesize: 4.66 MB

Reviews

Thorough information! Its this type of great go through. It is amongst the most incredible publication i actually have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Germaine Welch)

RECENT ADVANCES IN BIOLOGICAL MEMBRANE STUDIES: STRUCTURE AND BIOGENESIS OXIDATION AND ENERGETICS

DOWNLOAD

Springer-Verlag New York Inc. Paperback. Book Condition: New. Paperback. 554 pages. Dimensions: 9.6in. x 6.7in. x 1.3in. A NATO Advanced Study Institute on New Developments and Methods in Membrane Research and Biological Energy Transduction was held in order to consider some of the most recent developments in membrane research methodologies and results, with particular emphasis on studies of biological energy transduction. The participants in the Institute dealt with three general areas of membrane study: membrane structure (with emphasis on lipid and protein components), membrane component assembly (with particular emphasis on mitochondria and chloroplasts), and the specialized functions of certain membrane systems. This last area included discussions of topics such as drug transformation, the role of membrane electron transport in the generation of oxygen radicals, the effect of oxygen radicals on cellular homeostasis and on the structure, organization and function of the acetylcholine receptor. Lectures and posters were concerned with two central questions: what is the function of membrane structure in energy transduction and how can energy transduction be effectively measured and assessed. This text presents the content of the major lectures and important posters presented during the Institutes program. In issuing this book, the editor hopes to convey the proceedings of the Institute to a larger audience and to offer a comprehensive account of those developments in membrane research that were considered on the Island of Spetsai between August 16 and August 29, 1984. L. Packer Berkeley, California February 1985 v CONTENTS I. STRUCTURE AND BIOGENESIS Membrane Structure: Neutron Diffraction and Small Angle Scattering Studies 1 G. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
