## THE SOLAR SYSTEM, AN ASTRONOMICAL UNIT: A WORK OF DEDUCTION BASED ON A FUNDAMENTAL HYPOTHESIS (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The Solar System, an Astronomical Unit: A Work of Deduction Based on a Fundamental Hypothesis This work is an extension of former publications - Concepts of Electric Phenomena of Planetary Systems, and Electricity the Chemistry of Ether. The latter, a book of 600 pages, was destroyed by the San Francisco fire of 1906; and the former, a smaller book, was partially destroyed by the same fire. The larger work was based on the interpretation of facts of Electricity, Chemistry, Physics and Physiology, as viewed from the standpoint of the Hypothesis; the smaller was the application of the hypothesis to Astronomical facts. After the California earthquake of 1906 there was issued, in pamphlet form, \* 1 Earthquakes, an Astronomical Question. This, with slight alteration, is reproduced in the present publication. It was intended to publish the astronomical deductions as the fourth part of a larger volume, the first part of which is an elaboration of the immediate deductions from the general hypothesis, which were formulated as a platform of secondary principles, from which to draw further deductions. The second part of the larger work is devoted to Heat and Light; and the third part to Electricity, Roentgen Rays, Photo-electric Phenomena, etc. Hence it is clear that in the present small volume no large amount of space can be devoted either to the hypothesis or to the direct deductions from the hypothesis. For instance the chapter dealing with the physical character of ether is simply a synopsis of the original; and the same characterization applies to that on Heat and Light. The publication of the larger work, now in manuscript, will follow. About the Publisher Forgotten Books...
